G2  Paired patch-bootstrap effects (5000 replicates; 95% percentile intervals)
ΔValid  (IoU percentage points)
ΔTest  (IoU percentage points)
D = ΔTest − ΔValid  (IoU percentage points)
C1: full14-S2 − RGB-S2
C2: full14-S2-N2 − full14-S2
R1: RGB-S2 − RGB-S1
R2: full14-S2 − full14-S1

Frozen checkpoints; patches treated as exchangeable; no spatial correction; Test is a historical benchmark already used during research feedback.
Intervals crossing zero are not distinguishable from zero; point estimates are shown regardless.
